To continue the amazing corrective and anti-aging results, we recommended that at any time you begin adding the rejuvenating products and treatments recommended especially for you.

A quarterly BBL (Fotofacial/IPL) gives skin dramatic results. BBL treatments literally repairs damaged DNA, increases the collagen layer and reduces brown spots, broken veins and fine lines. As discussed in your consultation, Botox is the best defense against wrinkle formation and fillers such as Juvederm and Voluma replace the lost volume in the cheeks, fold lines and lips, creating instant youthful contours. The artful marriage of products, treatments and injectables at Clinique Dallas - really is your "fountain of youth"!
